Profile

Senior Mobile Software Engineer adept in all stages of advanced react native development. Knowledgeable in user interface, testing, and debugging processes. Bringing forth expertise in design, installation, testing and maintenance of react native applications. Equipped with a diverse and promising skill-set. Proficient in an assortment of technologies, including JavaScript, TypeScript, React, Redux, Node, Jest, Detox, GraphQL, Apollo Client, React Query and Axios. Able to effectively self-manage during independent projects, as well as collaborate in a team setting. Passionate about learning and keeping up to date with new emerging technologies.

Education

Information Technology, Florida International University, Miami

JUNE 2014 – DECEMBER 2018

- Graduated in December of 2018 with a GPA of 3.7.
- Major: Information Technology (Software Track).

Employment History

Lead Mobile Software Engineer, Caribu, Miami

JUNE 2020 – PRESENT

- Own medium-to-large sized features from technical design through completion.
- Continuously research and promote implementation of technologies and processes that can help with product efficiency, security and enhance the product overall.
- Spearheaded the migration of the app architecture into a more high-performing codebase that can help with product efficiency and stability.

React Native Software Developer, Genius Plaza, Miami

OCTOBER 2019 – JUNE 2020

- Create and review mobile applications in React Native for iOS and Android devices with a product oriented team following the scrum methodology.
- Create Unit and Automated UI Testing to help easily identify bugs and increase stability of code base.
- Work with non-technical product owners to guide technical decision making for upcoming features.
- Create features independently and as a team with React Native and Back-End Developers.
- Manage App Deployment for both the Apple Store and Google Play Store.

Software Developer, FastPBX, Miami

JULY 2018 – SEPTEMBER 2019

- Developed, tested and implemented new React Native projects.
- Worked with experienced team members to review new and existing code to optimize performance.
- Researched new ideas and solutions to improve app performance.
- Tested, maintained and recommended software improvements to ensure strong functionality and optimization.

Problem Solver / IT Assistant, Amazon, Miami

FEBRUARY 2015 – AUGUST 2015

- Answered user inquiries regarding computer software or hardware operation to resolve problems.
- Maintained records of daily data communication transactions, problems and remedial actions taken, or installation activities.
